LTG 804-062

boite à empiler les feuilles

The benefit of a double-box stacker lies in the possibility of non-stop stack changes. The stacker can automatically switch delivery to the other box when the desired stack height on the pallet is reached. The sheets are carried over the stacker box by an overhead magnet system and slowed to standstill at the moment of delivery. The sheets are then supported on an air cushion as they drop onto the stack.

Spécifications techniques

CazProductNuméro CPN	6707
Nom	LTG 804-062
Année de construction	2004
Longueur max. de la feuille	970 mm
Largeur max. de la feuille	1150 mm
